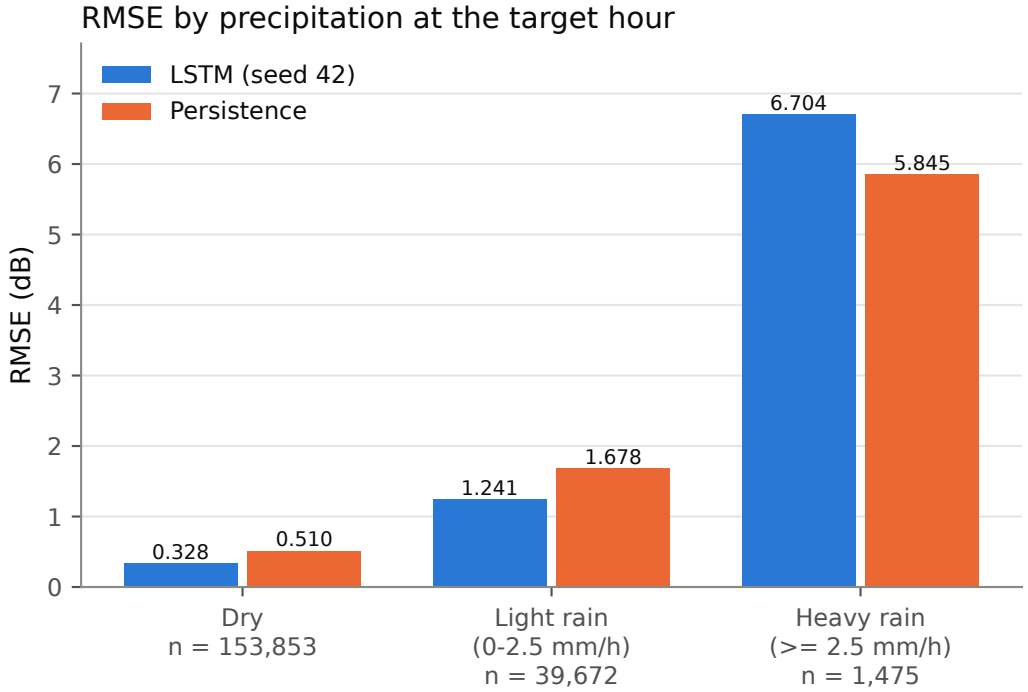
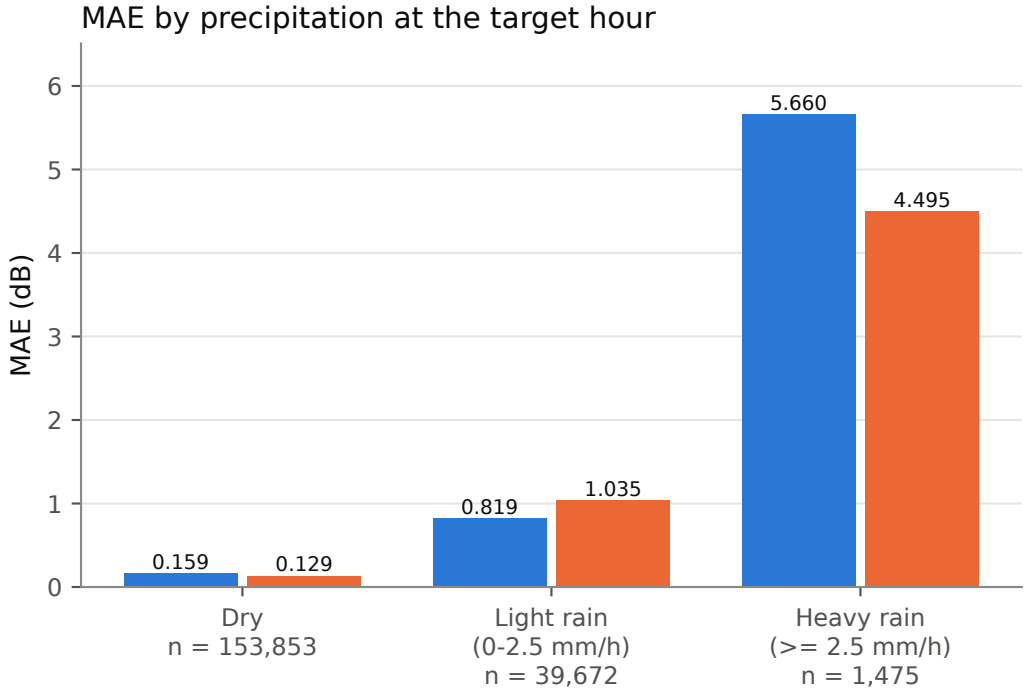
Heavy rain is the weak point: the LSTM is worse than persistence there (RMSE 6.70 vs 5.85 dB)





Test set: causal_hourly_v1, 6 cities, 2024-04-04 to 2024-12-31, 39,000 origins x 5 horizons (195,000 values). Classes use ERA5 precipitation observed at the target hour (outcome-based, diagnostic only). All values included.
